TLPT1SH

Reel Specifications

Model	Weight (oz.)	Line Capacity (yd./lb.)	Braid Capacity (yd./lb.)	Gear Ratio	RPT*
TLPT1SH	6.3	120/12	120/50	7.5:1	30"

*Recovery per turn.

FEATURES:

- Strong one-piece aluminum SLP frame and sideplates with Titanium deposition finish
- Aircraft-grade double anodized Duralumin drilled and chamfered U-shape 32mm spool
- Hard aluminum alloy Speed Gears, cut on Hamai CNC gear hobbing machine
- Premium 11-bearing system with double-shielded stainless steel ball bearings and Zero Reverse one-way clutch bearing
- Externally adjustable 6-pin, 27 position, QuietCast™ adjustable centrifugal braking system (ACB)
- Double anodized aluminum spool tension adjustment with audible click
- Rugged carbon fiber drag system provides up to 20 lbs. of drag power
- Bowed lightweight 95MM carbon fiber handle with Winn Dri-Tac knobs
- Double anodized aluminum drag star with audible click adjustment
- Titanium-coated zirconia line guide
- Exclusive patented Speed Dial line indicator and patented Speed Keeper® hook keeper

ATTENTION BRAIDED LINE USERS!

If your Lew's® Baitcast reel has pre-drilled holes in the spool, you may tie your braid directly to the spool, by passing the braid thru the provided holes and tying a uni-knot.

If your Lew's baitcast reel does not have pre-drilled holes in the spool, you will need to first tie on and spool at least 20 revolutions of monofilament line, and then tie your braided line to the monofilament line, with either a back-to-back uni-knot or an Albright knot.

Continue to spool your reel as normal, keeping strong tension on the line to ensure the line is firmly wound onto the spool to keep from "digging in" to underlying line layers when pressure is put on the line from fighting fish.

FAILURE TO PROPERLY SPOOL BRAIDED LINE ONTO YOUR REELS SPOOL WILL RESULT IN LINE SLIPPAGE, AND THE IMPRESSION YOUR DRAG IS NOT WORKING PROPERLY.

Performance — Right out of the Box!

Your Speed Spool® SLP reel is designed for performance and functionality. From the way it conforms to your hand, to the way it reacts crisply and effortlessly to your command, you'll know the minute you grab onto your Speed Spool® SLP that you've got a quality reel.

Your Speed Spool SLP reel exploits several new developments which will allow you to set yourself apart from the competition.

One-piece Aluminum Frame and Sideplates

Your Speed Spool reel utilizes a one-piece all aluminum frame and sideplates with Titanium Deposition finish, making the Team Lew's Pro Titanium the strongest Lew's reel ever built.

Speed Gears

Hard aluminum alloy Speed Gears are cut on the finest Hamai CNC gear hobbing machines resulting in precise gear interface for smooth cranking power.

Zero Reverse Bearing

The handle on your Speed Spool reel will only rotate forward for rock solid hook setting. When you release the handle, it will hold its position because of the Zero Reverse® bearing, never losing an inch on your catch; an invaluable property to have when you're pulling it in.

Externally 6-Pin QuietCast Adjustable Centrifugal Brake System (ACB)

The SpeedCast® Quite Cast Adjustable Centrifugal Brake System delivers an extreme range of braking power from free spool to maximum by simply clicking its external dial to choose among 27 variable settings. The ACB system puts you in control of your casts, perfectly aligning brake power to conditions. With this system you will have quiet and smooth casting control over light lures, while maximizing casting distance with all lures.

Cast Control System

A second feature exists to prevent backlash, the Cast Control System. The adjustment knob is found next to the star drag. This function saddles the spool shaft with steady pressure in order to stabilize spool speed.

To calibrate the system reel your lure in until it rests on the tip of the rod, then tighten the knob until taut. Depress the thumb bar, and holding the rod horizontally loosen the knob slowly until the lure begins to descend. The spool should continue to spin after the lure contacts the ground, but should not complete more than one full rotation. If the spool does not continue to spin, the knob is too tight.

If the spool completes more than one rotation, the knob is too loose. Repeat until you have achieved the desired results.

Bowed 95mm Carbon Handle

The 95mm bowed handle will give you all the cranking power you need. The comfortable Winn Dri-Tac knobs provide a sure grip for all day fishing performance.

TEAM LEW'S® PRO-Ti SPEED SPOOL® SLP TLPT1SH

Maintenance and Care

When applying lubricant to your Speed Spool® reel, avoid using multi-purpose oil. Use lightweight oils or greases made for fishing reels. Apply oil to all bearings, the crankshaft and the worm gear. Apply grease to the bushings, pinion gears, drive gears, and crank gears.

After usage, your reel should be inspected for dirt or sand and cleaned if excessive build-up is present. If your reel has come in contact with saltwater it is important to flush all parts with water, dry and re-lubricate your reel. Through diligent cleaning and maintenance your Lew's® reel will provide you with years of reliability and sound performance.

Fig. 1 To remove palming sideplate slide down level and pull sideplate off.

Register Lew's product warranty online at: lews.com

One Year Limited Warranty For Warranty information and registration go to lews.com

Lew's warrants its products¹ to withstand normal² use for the purpose designed and intended when manufactured for a period of one (1) year from the original retail sale date to the original retail consumer. Lew's will at its option repair or replace³ Lew's products when required for the warranty period and return⁴ the product to the owner at no additional⁵ cost to the owner. Numerous products have been manufactured under variations of the Lew's name and under the Lew's Logo by multiple businesses over the past 50 years. This warranty is specifically for products manufactured on behalf of Lew's of Springfield, Missouri USA since January 1, 2010. Lew's products manufactured by or on behalf of other entities prior to January 1, 2010 are not covered by this warranty. In all circumstances, this Warranty is Limited in Value to the original retail value of the product and is limited to actual damage to the Lew's product and only the Lew's product. ²Loss of a product, and loss/damage of a product or parts due to the attempted repair or servicing of a Lew's product by any person or business other than Lew's or Lew's Authorized Warranty Service Agent, and damage caused by or resulting from abuse, misuse, lack of recommended maintenance, accident, acts of God, and shipping damages occurring in transit to Lew's or Lew's Authorized Agent are outside the scope of Lew's Limited Warranty and will be repaired through Lew's® after warranty services at the expense of the consumer. ³Any products replaced by Lew's will be new or remanufactured by a Lew's Authorized Agent with the same or next model upgrade product. ⁴Lew's will return warranted products to the consumer by reasonable means as determined by Lew's. ⁵Express or expedited services are the responsibility of the consumer as is sending the product to Lew's or Lew's Authorized Agent, for Warranty Service. Lew's and Lew's Service Agents as authorized by Lew's are the sole agents authorized to repair or replace Lew's products under the terms of this warranty. Only written changes by an officer of Lew's can alter the terms or conditions of this warranty.

This warranty gives you specific legal rights including additional rights extended by some states which do not allow certain exclusions and limitations. Any action brought against Lew's for the purpose of settling a warranty dispute shall be brought and litigated in the State of Missouri, County of Greene.
